

Crack-Vac 2™

Clean and prepare cracks — dust-free*!

The environmentally effective way to remove dirt and debris from pavement cracks, virtually dust-free.

The **Crafcro Crack-Vac 2** is the ultimate tool for pavement crack cleaning and crack sealing preparation. Its high-efficiency air blowers effectively dislodge trapped material, while its powerful vacuum suctions it swiftly away.

It's the only standalone system with this dual function, and the best way to clean pavement cracks and maximize crack sealant longevity!

- The Crack-Vac 2 innovative EZ-glide wand swivels for near 360° mobility, allowing operators to move freely with less fatigue.
- The powerful blower and vacuum create a single-pass solution that clears and prepares cracks with maximum efficiency.
- The EZ Glide Vacuum wand's triple air nozzles inject high pressure air into cracks to force debris out. Simultaneously, the suction port vacuums up debris through the hose into the cyclonic filter system, keeping particulates and fines out of the air.
- The Crafcro Crack-Vac 2's HEPA-rated after-filter reduces fugitive dust and crystalline silica particulates to as little as .3 microns,* achieving the industry's lowest occupational exposure limits (OELs).

With the Crack-Vac 2, you can keep your workers and communities safe — and your operation in compliance with pressing environmental legislation.

Crack sealing is the most effective and lowest cost pavement preservation treatment.

- Pavement cracks that are clean, routed or non-routed, prior to crack sealing, provide the longest service life and best return on investment.

The most expensive part of crack sealing is sealing the same crack again!

- Labor makes up 80% of the cost of crack sealing. The combination of routing and cleaning with crack sealing extends pavement life and is the most cost-effective preservation treatment for flexible pavements.
- Using the Crack-Vac 2 delivers superior crack cleaning performance. There is nothing else like it, and no better way to prepare asphalt pavement cracks.
- The Crack-Vac 2 is the only unit on the market designed specifically to clean cracks using a powerful combination of compressed air and suction.

*Per High Efficiency Particulate Air (HEPA) filter standard measures.

Delivering Confidence Through Innovation, Quality and Value Since 1976

STANDARD FEATURES

- Kohler Command Pro gasoline engine 27 HP (20.1 kW) at 3,600 RPM
- 100 Gallon (378.541 l) holding tank with hydraulic dump
- Cyclone separator
- HEPA Filter
- 95" long cab over boom with an additional 72" extension
- EZ-Glide wand
- Light weight suction hose
- Ready for truck or trailer mount

OPTIONS

- Air compressor (kohler gasoline engine CH620 – 19hp)
- Extra main cartridge filter
- Extra HEPA filter
- Extra 5 gal pail liner (25 count)
- Dual axle trailer with storage deck
- Various safety and work light kits

TRAILER OPTIONS

- 2 5/16" Ball Hitch
- Pintle hitch (2 1/2" or 3")
- Hitch extension, 18", 28" and 39"
- Truck connector, 7 pin round RV connector, blade terminals
- Truck connector, 7 pin round connector, round terminals
- Truck connector, 6 pin round connector
- Truck connector, 5 pin flat connector
- Cab brake controller
- Breakaway battery w/ charger
- Safety hook w/ latch (2 required)

Two-year warranty on all equipment. One-year warranty on parts purchased through Crafco. Visit www.crafco.com for full warranty coverage.
