

# NEW Carbide Technology

## ENHANCED Cutter Performance

New enhanced technology has made **Crafco Improved Carbide Router Cutters** an industry must-have.

Constructed with tungsten precision to balance hardness and durability, each tungsten carbide tip is brazed onto the forged high-alloy and hardened steel body and inspected to assure the strongest, most reliable joint possible.

Proven in field trials to offer **OVER 30% MORE CUTTER LIFE**, Crafco Long-life Carbide Router Cutters are optimized to perform and persevere in the toughest conditions.

New and Improved Crafco Carbide Router Cutters feature:

### STRONGER longer-lasting steel

Premium, forged high-alloy, and hardened carbide steel designed to persevere through the toughest conditions.

### IMPROVED carbide design

Larger, industrial-brazed tungsten carbide tips are constructed to balance hardness and durability for even greater wear resistance.

### OVER 30% MORE cutter life

A wider carbide tip supports greater coverage and prevents wearing into the steel.

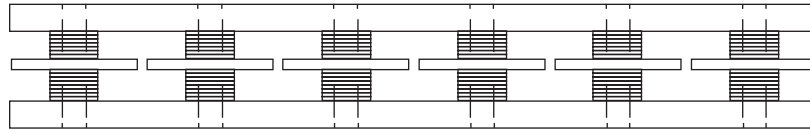

Delivering Confidence Through Innovation, Quality and Value Since 1976

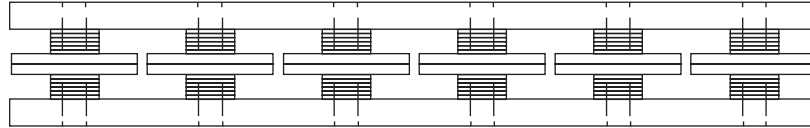

**Different size cutter head spacing options to meet your needs.  
Align or stagger carbide cutters to configure desired cut width.**

**No Hub  
31135-37**

Cleaner cut on wider reservoirs • Reduced vibration • Longer cutter change intervals

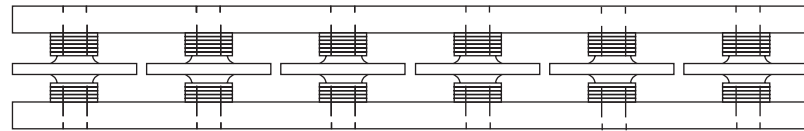

1/2" Cut

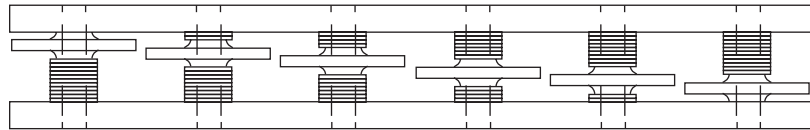

3/4" Cut

**Standard Hub  
31136-37**

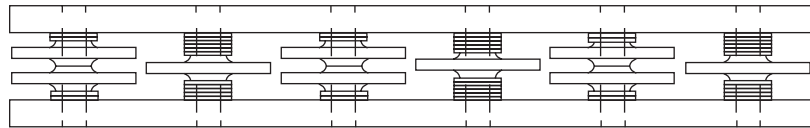

Stagger cuts • Industry standard – Stagger placement to adjust the cutting width

1/2" Cut

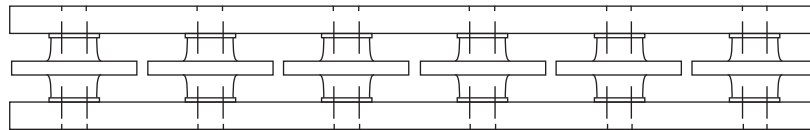

Staggered  
for Wide Cut

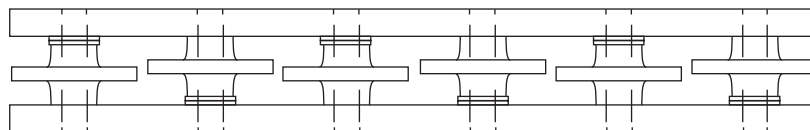

Add center  
cutter for  
wide cut

**Wide Hub  
31145-37**

Zero cutter wobble • Cleaner cut • Reduced pin wear

1/2" Cut

Staggered  
for Wide Cut
